

Barcelona, March 13th, 2020

On behalf of the organization committee of the 4th Prehabilitation World Conference, we would like to inform you that **due to the continual spread of Novel Coronavirus (COVID-19)**, PWC local committee, according to the resolution of the Spanish health authorities, has taken the decision to **postpone indefinitely**, originally scheduled for May 28th-29th in **Barcelona**.

We believe it is our collective responsibility to minimize the risk of COVID-19 spreading further and to reduce the numbers of people travelling between countries at the present time. We are looking into a possible alternative of an online version of the Conference.

We realize how essential all the health professionals are during this time, and that being present in their hospitals for outweigh any other normal activities. We feel a responsibility to our attendees and our primary concern is for health and welfare of all our participants, as well as the wider community.

We will be in direct contact with registered attendees, abstract submitters, invited faculty and other stakeholders in the next 1-2 weeks to explain the next steps. More information will be announced during next weeks. Please do check our website for the most recent updates.

If you have any significant concerns, please feel free to contact to the scientific@prehab2020.com and info@prehab2020.com

Best regards,
Dr Graciela Martínez Palli
